

## Recovery-Oriented Mental Health System transformation in India (ROMHSI-1) Theory of Change

The co-produced theory of change contains several points of intervention which will be addressed in future funding applications

For more information see [researchintorecovery.com/romhsi](http://researchintorecovery.com/romhsi)

Activities	Intermediate outcomes level 2	Intermediate outcomes level 1	Long-term outcome	Barriers
<ol style="list-style-type: none"> <li>1. Public campaigns including street campaigns to engage the community</li> <li>2. Voter registration and access to voting</li> <li>3. Strategic political action including lobbying political parties, Parliamentarians at Federal and State level</li> </ol>	<ul style="list-style-type: none"> <li>• Increased awareness amongst stakeholders and mental health service users about voting rights</li> <li>• Mental health funding audit of vacancies, resources and entitlements</li> </ul>	<ul style="list-style-type: none"> <li>• Increased representation in vote bank</li> <li>• Political empowerment including voting or standing for elections at all levels (local, state, national)</li> <li>• Creation of a National Commission for Mental Health by Government</li> </ul>	<p><b>Mental Health is a mainstream political issue</b></p>	<ul style="list-style-type: none"> <li>• Corruption</li> <li>• Lack of political will / agenda</li> <li>• Ministry is risk-averse</li> <li>• State vs national level is uncoordinated</li> <li>• Low mental health awareness</li> <li>• Census does not include psychosocial disabilities</li> </ul>
<ol style="list-style-type: none"> <li>4. Service user communities provide media content</li> <li>5. Community monitoring of media</li> <li>6. Engagement with press to build relationships</li> </ol>		<ul style="list-style-type: none"> <li>• A sensitive, credible media</li> </ul>		
<ol style="list-style-type: none"> <li>7. Consultations with people with lived experience to understand recovery</li> <li>8. Investigate stakeholder perspectives on recovery to identify points of agreement</li> <li>9. Accessible training for persons with lived experience &amp; family members to effectively</li> </ol>	<ul style="list-style-type: none"> <li>• Accessible formats or processes for social entitlements</li> <li>• Persons with lived experience are involved in co-creation and co-design of mental health programs</li> <li>• HR policies government sector make reasonable accommodation for people with lived experiences</li> <li>• Incentives to be more</li> </ul>	<ul style="list-style-type: none"> <li>• Targets for mental health budgets</li> <li>• Increase mental health human resources who are sensitive and recovery-oriented</li> <li>• Anti-discriminatory policies at work and education</li> <li>• Harmonize policy and regulation</li> <li>• Set and monitor targets for social inclusion</li> </ul>	<p><b>Mental health policy and services are responsive and recovery-oriented</b></p>	<ul style="list-style-type: none"> <li>• No shared understanding of recovery</li> <li>• Lack of metrics for quality audits to assess for recovery and rights orientation of services</li> </ul>

<p>participate in consultations and design of mental health policies and programs</p> <p>10. Engage &amp; train mental health professionals in rights &amp; recovery issues</p> <p>11. Map and improve access to welfare benefits, advocacy, community interventions</p>	<p>positive towards mental health</p>	<ul style="list-style-type: none"> <li>• Service users employed in Ministries</li> </ul>		
<p>12. Training activities and audits to promote MHCA implementation</p>	<ul style="list-style-type: none"> <li>• Mental health act and policy modified to take account of intersectionality</li> <li>• Identify gaps in MHCA</li> </ul>	<ul style="list-style-type: none"> <li>• A fully implemented MHCA</li> </ul>		
<p>13. Affordable and accessible training for community in multiple languages</p> <p>14. Consult clinicians about their understanding of recovery to identify training needs</p> <p>15. Co-design services and interventions</p>	<ul style="list-style-type: none"> <li>• Improved training of mental health professionals</li> <li>• Professionals' communications are more respectful of users and families</li> </ul>	<ul style="list-style-type: none"> <li>• Reorientation of system (family + caregivers) and increase support</li> <li>• Abolish long stay mental health institutes</li> <li>• Build community care systems</li> </ul>	<p><b>All mental health services are humane, accountable &amp; rights-oriented</b></p>	<ul style="list-style-type: none"> <li>• Clinicians' views about recovery</li> <li>• Financial incentives exist for medications over non-biomedical approaches</li> <li>• Administrative barriers</li> <li>• Organizations resistant to mental health accommodations</li> <li>• Social entitlements are discriminatory and not accessible</li> <li>• Mental health seen as resource-intensive</li> </ul>
<p>16. Create a recovery story collection in multiple local languages</p> <p>17. Create understandings of recovery in visual form for maximum public accessibility</p> <p>18. Develop a mental health activist consortium</p> <p>19. Audit training for</p>	<ul style="list-style-type: none"> <li>• Mental health services become more accountable to users and families</li> </ul>	<ul style="list-style-type: none"> <li>• Create a citizen voice platform nationally</li> <li>• User-led movement</li> <li>• Build alliances with traditional healers, and other inter-sectoral stakeholders</li> </ul>	<p><b>A citizens movement for mental health recovery is created</b></p>	<ul style="list-style-type: none"> <li>• Recovery stories are not visible</li> <li>• The understanding of recovery is not widely accessible to the public</li> <li>• Difficulty in building alliances: different priorities, lack of trust</li> </ul>

community engagement & accountability 20. Conduct social media awareness campaign with inter-sectoral partners 21. Undertake user-led research
